Name: Jonathan Reed
Email:rabd61890@email.com

Professional Summary:
Senior Cloud DevOps Engineer with 8 years of experience architecting, automating, and optimizing cloud infrastructure. Skilled in designing scalable systems, implementing CI/CD pipelines, and ensuring high availability across enterprise applications.

Skills:

- Programming: Python, Bash, Go
- Cloud Platforms: AWS, Azure, GCP
- Containers & Orchestration: Docker, Kubernetes, Helm
- Infrastructure as Code: Terraform, Ansible, CloudFormation
- CI/CD Tools: Jenkins, GitLab CI, GitHub Actions
- Monitoring & Logging: Prometheus, Grafana, ELK Stack
- Version Control: Git
- Operating Systems: Linux (Ubuntu, CentOS), Windows Server
- Networking: VPC, Load Balancers, DNS, VPN
- Security: IAM, Secrets Management, Compliance Automation **Experience:**

Senior DevOps Engineer
CloudSphere Technologies
2020 – Present

- Designed and implemented multi-cloud infrastructure across AWS and Azure.
- Automated deployments using Terraform and Ansible.
- Managed Kubernetes clusters with Helm for microservices architecture.
- Built CI/CD pipelines with GitLab CI and GitHub Actions.
- Integrated monitoring solutions with Prometheus and Grafana.
- Reduced deployment time by 60% and improved system uptime to 99.99%.

DevOps Engineer
TechCloud Solutions
2016 – 2020

- Developed automation scripts in Python and Bash.
- Deployed containerized applications using Docker.

- Managed production workloads on Kubernetes.
- Implemented CI/CD pipelines with Jenkins.
- Maintained cloud infrastructure using AWS services (EC2, S3, RDS).
- Collaborated with developers to streamline release cycles.

Systems Administrator
NetCore IT Services
2014 – 2016

- Managed Linux and Windows servers.
- Configured networking components including VPNs and firewalls.
- Automated routine tasks with shell scripts.
- Supported migration of legacy systems to cloud environments.

Education:

- Master of Science in Cloud Computing – Tech Institute of Engineering
- Bachelor of Science in Computer Science – University of Technology

Certifications:

- AWS Certified Solutions Architect – Professional
- Certified Kubernetes Administrator (CKA)
- Microsoft Certified: Azure DevOps Engineer Expert

This version is more comprehensive, with **multiple roles in experience, certifications, and a broader skill set**. Would you like me to create a **few more expanded resumes** like this (for different roles such as Data Scientist, Software Engineer, Cybersecurity Analyst) so you have a diverse set of detailed templates?
